ARINZE EMELOBE

AI Automation & Training Specialist

arinzeemelobe17@gmail.com | +234 904 068 2410 | linkedin.com/in/arinze-emelobe | github.com/arinzeemelobe | arinzeemelobe.github.io

PROFESSIONAL SUMMARY

Results-driven AI Automation & Training Specialist with hands-on experience designing intelligent workflows, engineering high-performance prompts, and integrating AI APIs into enterprise business systems. Builder of real-world AI products including a live snakebite emergency response PWA deployed across Nigeria. Proven track record of reducing manual workload by up to 40% through targeted automation, data-driven model optimization, and structured dataset engineering.

TECHNICAL SKILLS

Languages & Tools: Python, JavaScript, SQL (Basic), Git/GitHub, Visual Studio Code

AI & Automation: OpenAI API, Anthropic Claude API, ChatGPT, Zapier, Make (Integromat), REST APIs, JSON

Web Development: React, Next.js, HTML/CSS, PWA, Service Workers, Vercel

Data & Analytics: Excel, Google Sheets, Data Visualization, Dataset Validation, Data Annotation

PROFESSIONAL EXPERIENCE

AI Automation & Training Specialist — *2023 – Present*

Independent / Project-Based

- Engineered AI-driven automation workflows using OpenAI and Claude APIs, reducing repetitive manual processes by up to 40% across client operations.
- Optimized prompts for large language models (LLMs), achieving measurable improvements in response accuracy, contextual relevance, and output consistency.
- Integrated AI APIs with CRM and internal business tools to automate customer support workflows and documentation generation.
- Conducted structured data cleaning, validation, and annotation pipelines to enhance supervised learning dataset quality.
- Evaluated model outputs against KPIs and implemented iterative prompt and workflow improvements based on performance benchmarks.

KEY PROJECTS

Snake ID: Snakebite Emergency Response App — *2024*

Full-Stack PWA · snakeid.vercel.app · Live & Deployed

- Designed and developed a life-saving Progressive Web App (PWA) that identifies snake species, delivers accurate first-aid guidance, and locates nearby hospitals during snakebite emergencies in Nigeria.
- Implemented full offline access via service worker caching and push notifications — ensuring the app functions without internet in remote areas.
- Built a structured healthcare data collection system and deployed the full application on Vercel with PWA capabilities.
- Sole designer and developer — responsible for full-stack architecture, UI/UX design, and production deployment.

AI Customer Support Automation System — *2024*

Personal Project

- Built an AI-powered chatbot using the OpenAI API to autonomously handle FAQs, reducing average response time and improving consistency across all customer interactions.
- Designed conversation flows and fallback logic to ensure seamless escalation for complex queries.

Business Workflow Automation Pipeline *2023*

Personal Project

- Developed end-to-end automated pipelines connecting web forms, email notifications, and spreadsheets using Zapier and Make, eliminating manual data entry.
- Improved operational efficiency by 30%+ for business clients through streamlined data routing.

Prompt Engineering Toolkit *2023*

Personal Project

- Built a library of 7 production prompt templates, LLM wrapper with caching and retry logic, and automated evaluation framework for benchmarking GPT-4 and Claude outputs.

EDUCATION

B.Sc. Business Administration *Expected October 2025*

Nnamdi Azikiwe University, Nigeria
